Title Pro Kapital Council approved Consolidated Interim Report for III Quarter and 9 Months of 2022

MANAGEMENT REPORT

CEO summary

The third quarter of 2022 continued the trend we have seen in Q2, with a strong demand for real estate assets in the Baltic countries (particularly Estonia and Lithuania).

The market still seems resilient, despite the negative sentiment caused by raising interest rates and an overall bearish outlook of the global economy.

Local and international investors still seem to have a strong interest in the Baltic area, especially in the premium properties segment.

After a few months where it seemed impossible to fix a price with construction companies, due to the volatility in the market of construction materials and supplies, there seem to be an increasing will from the local contractors to get back to work, even at the cost of partially absorbing the development risks, and the fluctuations in the cost of materials.

Real estate development

In Tallinn, we have continued construction of Kindrali Houses and Kalaranna projects.

In Q3 of 2022 we finalised handing over all of the apartments in Kalaranna project, where completion of eight buildings with the total of 240 apartments is now achieved.

This first phase of the Kalaranna project has been a major success, and we are

currently working alongside some local construction companies, who are studying the tender package. Our intention is to start the mobilisation of the site for the next phase of Kalaranna (four building for a total of 146 apartments) somewhere between Q1 and Q2 2023.

In Kindrali Houses, we have started the process of notarising deals in the first two buildings (black and white building), which have now reached completion. The third building (red building) is expected to be completed by the end of 2022. All in all, these three buildings comprise 195 residential and 1 commercial units, all of which are sold.

In Riga we are selling our ready luxury product River Breeze Residence and started the tendering process for the further development of Kliversala Residential Quarter - Blue Marine. We have received several offers from construction companies and are in the process of identifying the best option. The tendering process has taken longer since the company has decided to look into various value engineering options to mitigate the risk of increasing construction costs.

In Vilnius, we only have 4 unsold apartments in our Shaltiniu Namai Attico project (including one which serves as a showroom). The real estate market has had a great run in 2021 and we saw a great deal of interest for our luxury properties, achieving some of the highest prices per square meter in all the local market. The construction tendering for the following phase of city villas and a commercial building is now at its final stage are we are expecting to enter into an agreement with the winning bidder within November-December this year and start the construction works within the 1st quarter of 2023.

Hotel operations

We are in the process of renovation of the second half of the rooms (first half has been renovated 5 years ago), which will be completed by the end of the year. The works will also have the added benefit of converting an unused area into 7 standard rooms and creation of a luxurious suite with private sauna and terrace, which will greatly improve the overall prestige of the hotel.

Since the ongoing works, the hotel's available inventory has been only at 50% for a good part of 2022. Despite this, in the first 9 months it has reached a substantial operative break-even, thanks to a) the MICE (Meetings, Incentives, Conferences and Exhibitions) coming back after a long pause due to the pandemic, and b) an increase in the Average Daily Rate (ADR) which is currently at 89.12 euro (September data), a substantial increase when compared to the 81.07 euro rate of September 2021.

In conclusion, we are confident in our abilities to navigate these turbulent times, thanks to our experience and to the resilience of the Baltic markets. We maintain our position to expand our current inventory, by making intelligent bets on what we feel like the market may absorb, thus creating long-term value for our shareholders and for the communities that we aim to develop in a

sustainable, comfortable and aesthetically pleasing way.
