Title Aavo Kärmas, Chairman of the Management Board of Enefit Green, will resign in agreement

In near future, the supervisory board will start the recruitment process for a new chairman of the management board.

Aavo Kärmas' mandate as a member of the management board and chairman of Enefit Green commenced on 5 July 2017.

"I joined the company with the aim of significantly growing the business and getting the company listed on the stock exchange. When we started, we had a team of 90 employees and production units were located only in Estonia, plus there was one power plant in Latvia. We now operate in five countries with a team of 127 dedicated employees. Upon completion of the projects currently under construction, the production capacity will grow to more than double compared to the situation seven years ago. Enefit Green also has a large investor community - 64,000 shareholders in whose interest we have been developing the company and creating value," commented Aavo Kärmas.

According to Andrus Durejko, Chairman of the Supervisory Board of Enefit Green, under the leadership of Aavo Kärmas, the company has grown into the largest wind energy producer in the Baltics and one of the largest companies listed on Nasdaq Baltic stock exchanges: "The activities have been expanded to Finland, Latvia, Lithuania and Poland and a successful listing of shares has been carried out. Enefit Green is a strong organisation with a capable and dedicated team."

In addition to Aavo Kärmas, the Management Board of Enefit Green includes Innar Kaasik (responsible for production), Veiko Räm (responsible for finance) and Andres Maasing (responsible for developments).
