Therefore the Company does not have any significant credit risk assuming that prices do not decrease significantly in the real estate market due to which the value of collateral would fall below the nominal value of the amount of all receivables. According to the assessment reports of apartments from 2004, the collaterals are adequate to cover the capital lease receivables. The prices on real estate market have significantly risen in past three years, on account of which there are no risks involved with the collateral.
